

Biscuits Require A Quick Oven

The best test of a quick-baking range is to try it with biscuits.

A cheap, light range may heat the oven quickly, but they will not be baked in a quick oven. Cheap oven material and leaky construction allow the heat to fly out and lose their flavor and when necessary.

A properly constructed range, in which you can operate easily and control, will prove the difference between a first class, high grade range and a cheap worthless one.

Cole's Down Draft Range

Is made of the best of material, of the proper weight and will do baking quickly without drying out or burning biscuits, pies, cookies, bread or whatever you wish to bake in it. The oven is made of heavy uniform steel, ribbed and braced to insure against warping.

The oven will retain its heat longer. This feature you will appreciate when you are in a hurry with an oven on a bottom, and you want to bake pies, cakes or biscuits, which require a prompt oven.

The "Hot Blast Combustion" burners are given. There is no waste—very little of heat is lost.

This new improved steel range is a money-saver for you to use. It will save fuel and will lessen your work. When ordered with polished top requires no blackening.

Burns soft coal, hard coal, lignite, wood and cobs.

The revival at the Lafayette Avenue Methodist church is being well attended and much interest is manifested. Rev. A. L. Sellers is conducting the meeting and is a deep student of the Bible. His sermons are very instructive and he is a great teacher of Bible doctrine. While his sermons are full of thought, he is at the same time a deeply spiritual preacher. His sermons appeal to the hearts and consciences of the people.

Ten good sermons were held yesterday. There were six additional to the church at the evening service. Tomorrow the hours, 2:30 to 4:30 in the afternoon and 7:15 at night.

Gas Springs. In the very best district in the South, the shores of the Dothan gas springs are the most famous in the South. The water is hot from the bottom of the earth. Six miles off the Atlantic coast there is a long line of bubbling springs of the soft fresh water. Dothan captures it in sparkling fountains and refills it in very modern pipes. Dothan is an almost drought, which lasts from January to December, and in a temperature that hardly ever sinks below 60 degrees and often rises to over 100 the natives have no worry about their water supply.

Thankful of Mother. "Little Albert" is a bright boy, in playing the other day he upset a beautiful Imported flower basket, a gift to his mother from a friend who traveled abroad.

Where, see what you've done? his mother said, pointing to the fragments on the floor.

"Yes, mother, but don't take off your slippers. You might cut your feet," warned the lad—Philosophical Times.

Not Too Good. "Unde, I'm a good boy," Bobby said to his father. "Unde, I haven't been very bad," Bobby said to his mother. "Not just a little," Bobby said to his father.

Blushing. "I'm a good boy," Bobby said to his father. "I'm a good boy," Bobby said to his mother. "I'm a good boy," Bobby said to his father.

You will never get the same vote by waiting for the next term round—Atlanta Constitution.

FASHION OF THE BARBOON

While the prohibition movement is far as making state-wide laws effective, has been a failure. It has failed men in the liquor business to think, something they never did before.

All who have studied the problem realize that the breweries have been to a great extent, responsible for the spread of the evil. They have extended the barroom into these sections, to the back rooms of groceries, to the suburbs, which should not be afflicted with the liquor at all.

They have warred against taxation and high licenses and because of this they have entailed state structures that have left marks never to be erased.

The breweries are taking the initiative toward a general and sweeping reform. It is the only way to save their cause.

At the Brewers' Congress held in Chicago, the members yielded to the demand of public opinion. They declared openly for better and cleaner methods in the retail distribution of alcoholic.

As indicating the trend of public opinion a model saloon was equipped in the exhibition hall with tables and chairs as a substitute of the old-fashioned bar.

This idea will be promoted. The custom of checking the treating habit also formed an interesting topic of debate and discussion. The treating habit is as much an evil as the liquor habit itself. In many of the best regulated clubs of the country it is being custom has been abolished. Each man buys his own drink, and goes without it. Most men try to derive the rule for they remember as usual.

The abandonment of the bar and the substitution of tables and chairs suggests possible advantages. The personal conduct of the saloon must be in sympathy with this change if it is to be made effective, however.

Barroom loafing is one of the greatest evils of the present saloon system. The comfort of the chairs should not be permitted to be a further incentive for this class of pastime. There is a danger of making the saloons too attractive.

The bar should be removed, tables and chairs should be substituted, if it is proposed to continue the sale of liquor, but loafing should be barred, and if a man desires a drink let him have it and leave.

The saloon men must awake and realize that they are in imminent danger of being driven out of business altogether. They had better cooperate with men who are seeking to reform and regulate the liquor trade, seek to better their business, and not further degrade it.

It is time a lesson was learned.—Commercial Appeal.
